PROJECTS / OPEN-SOURCE

Pharmacy Management System | Link

Java, JFrames, MySQL

The Pharmacy Management System is a Java-based application built using Java Swing (JFrames) on Apache NetBeans IDE. This system aims to streamline and automate various tasks involved in managing a pharmacy, including inventory management, sales tracking, prescription management, and more.

Exceller | Link

Python, Flask, Google-gen-ai, Javascript, HTML, CSS

Exceller is a web-based tool for summarizing Excel sheets using Google Generative AI. Users can upload Excel files (.xls, .xlsx, .csv), and Exceller will generate a concise summary of the sheet's content using a natural language processing model.

Admission Enquiry Chatbot | Link

Python, HTML, CSS, Javascript,

The goal of this project is to create an Admission Enquiry Chabot that responds to any inquiries posted by students on the college, courses, location, cost, and other topics. Machine learning techniques are used in the construction of the College Enquiry Chatbot project to evaluate user queries and comprehend user messages. All one needs to do is submit a question using the bot.
